

Goddess Garden Organics Debuts First Ever All-Natural, Chemical-Free Continuous Spray Sunscreen

Boulder, CO (March 18, 2013) – Today Goddess Garden Organics, the makers of the popular [organic sunscreens](#) for adults, kids and babies, debuts a first-to-market, Continuous Spray [Natural Sunscreen](#). It is the only all-natural, chemical-free continuous spray sunscreen on the market today.

“While natural sunscreens are always a smart choice, it has become even more important to avoid sunscreen chemicals in light of new research showing that oxybenzone, a chemical used in many conventional sunscreens, is associated with an increased risk of hormone disruption and closely tied to endometriosis,” says Nova Covington, Founder and CEO of Goddess Garden Organics. “Our mission is to educate consumers of the benefits of natural mineral sunscreens and the risks associated with chemical sunscreens. There are great options that are safe and effective! Just as moms became aware of the dangers of BPA a few years ago, my hope is parents will become more aware of the dangers of hormone disrupting chemical sunscreens too.”

The Goddess Garden Organics Continuous Spray Sunscreens join the Goddess Garden line of chemical-free, all-natural sunscreen lotions made with certified organic ingredients. All Goddess Garden products are non-toxic and biodegradable.

“We know that busy moms want a convenient sunscreen choice, and we’re thrilled to be able to provide the first natural, chemical-free option in the continuous spray bottle,” adds Covington.

Goddess Garden Organics sunscreens protect the skin from harmful UVA and UVB rays without the sunscreen chemicals, making it one of the safest natural sunscreens on the market today. Each product is sheer, non-greasy, absorbs quickly, and offers the highest percentage of organic ingredients available in any product on the market. To purchase the [organic continuous spray sunscreen](#) or other Goddess Garden Organics products, visit www.GoddessGarden.com.

About Goddess Garden Organics
