

Goddess Garden Organics wins “Best Sun Care” award in Delicious Living’s 2014 Beauty and Body Awards

For Immediate Release Boulder, Colorado – Goddess Garden, leaders in the natural sunscreen industry, received the “[Best Sun Care](#)” award in Delicious Living’s 2014 Beauty and Body awards for their groundbreaking top-rated continuous spray natural sunscreen. [Delicious Living](#), the presenter of the award, is the leading consumer magazine in the natural products industry. It is carried by more than 1,300 top natural products stores and is read by more than one million readers each month.

The award recognized Goddess Garden’s [Sunny Body Continuous Spray](#) as “The first nontoxic spray-on of its kind, this 94 percent organic sunscreen shields with minerals and nourishing plant compounds.” Goddess Garden won this award alongside a number of other brands, which were all recognized as innovators in the natural products industry. In their introduction to the awards, Delicious Living remarked, “Every year, we think we’ve seen and tried it all: the most luscious moisturizer, the cleverest beauty eco-packaging, the brightest natural makeup. Our thanks go out to these brands—this year’s Beauty & Body Awards winners—for once again proving us wrong and reminding us that innovation truly is a beautiful thing.”

Upon winning the “Best Sun Care” award, Nova Covington, CEO and founder of Goddess Garden remarked, “It is truly an honor to be recognized by this leading consumer magazine. This is our first time winning a Delicious Living Beauty and Body Award, and we are very excited.” Covington then added, “When we first designed our continuous spray sunscreen, we maintained our commitment to a safe, natural formula. That’s why you don’t see any ingredients like oxybenzone, octinoxate, or alcohols in this or any of our other products.”

Released in March of 2013, Goddess Garden’s sprays were the first mineral sunscreens available in a continuous spray format. These sprays will soon be joined by three new travel sized natural sunscreen tubes, which were officially announced by Goddess Garden earlier this month.
